DAYYALA RAVI

DevOps Engineer

Bengaluru / Hyderabad, India | +91 6281462646 | ravi13.dayyala@gmail.com
Portfolio: dayyala-ravi.github.io | GitHub: github.com/silent-resistor

PROFESSIONAL SUMMARY

DevOps Engineer and technical problem-solver with nearly 3 years of experience architecting resilient cloud infrastructure, automating CI/CD pipelines, and driving continuous integration. Possess a strong engineering background paired with hands-on experience in DevSecOps practices and secure SDLC implementations. Passionate about building scalable, highly available microservices and bridging the gap between rapid software deployment and secure operations

TECHNICAL SKILLS

- ***CI/CD & Automation:*** Jenkins, GitHub Actions, Bamboo, Bitbucket, Ansible, Makefiles, Jira, Confluence,
- ***Cloud & Containerization:*** Kubernetes, Helm, Docker, Docker Swarm, KVM/QEMU, AWS (EC2, S3, VPC, IAM, Lambda, ECS, EKS, Databases), Terraform
- ***Infrastructure & Monitoring:*** Prometheus, Grafana, SysInternals, Nginx, Zookeeper, Redis, MongoDB
- ***Scripting & Development:*** Python (Langchain, Django, Flask, Automation, OOPs), Bash, PowerShell, Java, JavaScript, HTML, Groovy, LaTeX
- ***Infrastructure Security:*** Web App Security Assessments, SAST/DAST, Active Directory Hardening, Networking, Cryptography, Linux/Windows Server Hardening

PROFESSIONAL EXPERIENCE

HCL Technologies Limited — Bengaluru, India
Technical Lead – DevOps & Infrastructure — *[July, 2023] – Present*

- ***CI/CD Pipeline Architecture:*** Designed and deployed greenfield **Jenkins** pipelines using **Groovy** (Pipeline-as-Code) with **Kubernetes** ephemeral agents, reducing manual build times while seamlessly supporting legacy **Bamboo** environments.
- ***Microservices & Containerization:*** Designed and engineered a highly available licensing application from scratch utilizing a microservices architecture (**Flask, Angular, Redis**) and orchestrated deployment via **Docker Swarm**.
- ***Observability & Automation:*** Deployed Prometheus and Grafana for comprehensive on-premise monitoring. Engineered **Ansible** playbooks to eliminate manual overhead for server maintenance, resource cleanup, and **SSL/TLS** certificate rotations.
- ***Secure SDLC Implementation:*** Enforced a secure development lifecycle by migrating manual builds to automated pipelines, integrating JFrog Artifactory to remove binary blobs from source control and ensure reproducible artifact management.
- ***Code Migration & Architecture:*** Spearheaded a massive legacy migration from Python 2 to Python 3.13.
- ***Awards:*** Recognized with the "**2good**" Award for sustained engineering excellence, rapid technical problem-solving, and outstanding contributions over a two-year period.

INFRASTRUCTURE SECURITY & CONTINUOUS LEARNING

- ***Security Research Platform (silent-resistor.github.io):*** Actively develop and maintain a technical knowledge-base documenting vulnerability research, secure system architecture, and Linux/Windows server hardening techniques.
- ***Applied DevSecOps & Security Labs:*** Regularly solve complex challenges on TryHackMe, Root-Me, and OverTheWire. Earned Junior Pentester and Web Penetration Testing certifications; currently advancing through DevSecOps tracks to master "Shift-Left" integration.

EDUCATION & CERTIFICATIONS

- ***Cloud & Infrastructure Certifications:*** AWS Certified Cloud Practitioner, AWS Certified AI Practitioner, Kubernetes, Docker, and Ansible (O'Reilly)
- ***Linux Training:*** Red Hat Enterprise Linux (RHEL 124 & 134 coursework)
- ***Security Training:*** TryHackMe (Junior Pentester, Web Penetration Testing), Ethical Hacking Course (O'Reilly)
- ***Master of Technology (M.Tech):*** Power Electronics and Drives | NIT Rourkela, 2023
- ***Bachelor of Technology (B.Tech):*** Electrical Engineering (EE) | SNIST - Hyderabad, 2021
